

# DisChargePlus

The economical choice for testing 36 & 48 volt battery packs!

The **DisChargePlus** is designed for usage with 36 and 48 volt battery packs. This tester measures the length of time that batteries can run on a single charge. Battery capacity testing is important as batteries age. The **DisChargePlus** provides an easy way to get an accurate measurement of battery capacity.

- 3 programmable discharge rates: 25A, 56A, or 75A
- Automatically stops discharge cycle based on minimum voltage reached, or time elapsed.
- No AC power required
- 200 amp clamps with 8 foot connection cables
- Stores the previous 14 discharge cycles
